

EcoDomo^{LLC}

Recycled Leather & Stairs

Jazz up your staircase and landings with EcoDomo leathers.

EcoDomo leathers are similar to hardwoods in density and maintenance making them ideal for stairs. Use sheets for your steps or tiles for your risers. Add a touch of Hermes™ elegance with a double stitched thread on the side. EcoDomo leathers work very well in stairs:

- In-laid within a wood or metal frame
- Wrapped around your stair tread
- As an accent on risers

Our leathers can be customized for color, texture, stitching, and can come pre-laminated on stair treads of your specification. Maintain like hardwoods with pH neutral cleaners. Made in the USA.
